

**Did you know that Perennial Energy offers custom maintenance plans?**

**Did you know that a preventive maintenance plan could save you \$1000's and significantly reduce downtime?**

## **Periodical Preventive Maintenance Is Key**

**All norms, industry guidelines, quality standards and regulations recommend periodical preventive maintenance as the most efficient way of ensuring system reliability.**

## **Tailor-Made Plans to Fit Your Needs**

**Now you can optimize the performance and lifetime of your Perennial Energy system with system-specific service plan. This new range of plans addresses your compliance and specifications requirements, while also taking your budgetary needs into account.**

## **Core Features Included in All Plans**

- **Annual preventive maintenance visit performed by a Perennial Energy certified field service Technician**
- **Comprehensive checkup (during the annual visit) of system specifications and key operational functions**
- **Software/firmware updates as needed**
- **Preventive replacement of worn parts (system-specific maintenance kit)**
- **Auditable service operating procedures**
- **Field service reports for post-visit traceability of key maintenance and system performance indicators**
- **Unlimited access to a technical support hotline**

## **Customized Options for Specific Needs**

**All service plans can be enhanced with additional customized options. Give our service technicians a call today at 417-256-2002 and let us keep your system running by customizing a plan for you**
