

THERMAL OXIDIZER

Features & Benefits:

- 100% Stainless steel waste gas burner
- Automatic auxiliary fuel control
- 4" Ceramic fiber blanket insulation
- Pre-Packaged to minimize installation costs
- Meets nationwide emission standards
- Various waste gas streams
- Varying sizes to meet your specific application, please contact sales for sizing

TOU Applications:

- RNG Waste Gas, VOC Waste Gas, Siloxane Removal Waste Gas, Other Low Btu Gas Streams
- Contact Sales for your specific project

Major Benefits:

- 24/7/365 Operating Time
- Low auxiliary gas usage
- Minimize costly downtime
- Varying waste gas Btu and flows
- Small footprint
- Self supporting
- Integrated controls

Additional Options:

- Multiple Waste Gas Streams including CO₂, VOC, and Siloxane Regeneration
- Natural Gas or Biogas Auxiliary Fuel
- Can be packaged with emergency flare
- Low NO_x emissions compliance for the more stringent air quality districts

Designed for your project by industry experts
